

Gender Equality in Science: How to achieve it?

Emilie Jäger Lecture | Faculty of Science
Prof. Paul Walton, University of York

28th April 2022, 14:15 – 16:00, Hauptgebäude Room 105
Lecture | Panel Discussion | Aperó

Paul Walton

In the inaugural Emilie Jäger Lecture, Paul Walton will discuss strategies to achieve gender equality in science.

The burden of change too often falls heavily on the shoulders of women to advocate for gender equality. With this invited lecture the Commission of Equal Opportunities of the Faculty of Science welcomes and recognises Paul's advocacy for gender equality in science over the last 25 years and for being a role model for change.

Emilie Jäger Lecture:

Emilie Jäger (1926-2011) was a geologist and the first female professor in the Faculty of Science. The Commission of Equal Opportunities of the Faculty of Science runs this annual invited lectureship as a platform to nourish and grow diversity at the University of Bern, by invitation of a role model both in their scientific field & diversity in academia.
